SUMMARY

B.Tech CSE (AI/ML) student (CGPA 8.50) with hands-on experience building and deploying full-stack applications using Python, FastAPI, JavaScript and REST APIs. Focused on clean, user-friendly software with validated inputs, version control and public deployment. Eager to contribute to a collaborative engineering team, learn agile practices and grow through coding, testing and debugging.

EDUCATION

JIS University, Kolkata 07/2024 – 07/2027
B.Tech, CSE (AIML) – CGPA: 8.50

Satyam International Institute of Technology, Patna 07/2021 – 05/2024
Diploma, CSE – 78.08%

DAV Public School, Bhagalpur 04/2020 – 03/2021
Matriculation – 82.6%

PROJECTS

NYC Airbnb Room Type Prediction System Live on Render | GitHub
Python, FastAPI, Scikit-learn, Pandas, NumPy, HTML, CSS, JavaScript, Git, GitHub

- Built and deployed an end-to-end web application on Render that predicts Airbnb room types (Entire home/apt, Private room, Shared room) in real time from listing attributes in the NYC Airbnb dataset.
- Designed a RESTful prediction API with FastAPI, integrating the trained model pipeline with robust input validation and returning predictions with confidence probabilities for clear, interpretable results.
- Developed a responsive, user-friendly frontend in HTML, CSS and JavaScript that connects users to the API with a simple, seamless workflow.
- Performed data preprocessing, EDA, feature engineering and hyperparameter tuning to train and optimize a Random Forest classification pipeline with Scikit-learn.
- Managed the codebase with Git and GitHub for version control and public accessibility.

Movie Recommender System Live on Streamlit Cloud | GitHub
Python, Scikit-learn, NLP, CountVectorizer, Cosine Similarity, Streamlit, TMDb API, Git, GitHub

- Developed and deployed an interactive content-based movie recommendation app on Streamlit Cloud that returns the top similar movies for a user-selected title.
- Integrated the TMDb API to dynamically fetch movie posters, improving the visual experience of the interface.
- Built an NLP pipeline with CountVectorizer and text stemming, combining genres, keywords, cast, overview and director metadata into feature vectors, and ranked results using Cosine Similarity.
- Used GitHub for version control and GitHub-based deployment to Streamlit Cloud.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL
Backend & APIs: FastAPI, REST API design, input validation
Web Technologies: HTML, CSS, JavaScript, Streamlit
Libraries & Frameworks: NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn, TensorFlow
Machine Learning & AI: Machine Learning, NLP, Data Preprocessing, Feature Engineering, Model Evaluation
Tools & Practices: Git, GitHub, VS Code, PyCharm, Jupyter Notebook, Google Colab, Kaggle, Deployment (Render, Streamlit Cloud)

CERTIFICATIONS

- Cloud Computing (Elite) – NPTEL, IIT Kharagpur
- Programming in Java – NPTEL, IIT Kharagpur
- Data Analytics and Big Data – Ardent Computech Pvt. Ltd.
- Full Stack Development with MEAN Stack – Ardent Computech Pvt. Ltd.
